Nanny Job Performance of Nancy Carter

To Whom It May Concern:

I have been privileged to employ Nancy Carter as my son's nanny for his first year of life. As a single parent, I knew that finding the right nanny would be vital to my success at juggling the demands of being a new mother and my career.

Nancy has been more than a nanny. She helped me to prepare my house before my son was born. She drove me to appointments, was my birth partner and photographer, and even stayed with me at the hospital around the clock while my son was in the NICU. She is a very tidy and organized person. Furthermore, she took excellent care of not only my son, but also my home and the nanny car I provided.

She is both professional and down-to-earth. Her education along with her years of experience with children have given her a calm, reassuring presence that is beneficial for both parent and child. She is very attuned to children's developmental needs and milestones, and always keeps safety as a top priority.

Nancy has always been willing and happy to help with all child-related responsibilities - car seat installation, bottle prep and washing, laundry, clothes and toy organization, baby proofing, and transitioning to solid foods. Her love for others as well as her desire to do her best shows in the care she provides. If there was anything she was uncertain of, she would research it, then discuss it with me. She has been a steady loving presence in my son's life. They both light up when they see each other.

Nancy has been a valuable addition to our family. I would highly recommend her to others.

Sincerely,   
Christina Lyons
